Add a global component to your college education by participating in a study away program.

The Associated Colleges of the Midwest operates off-campus study programs around the world, focusing on academic excellence and cultural immersion. Most programs are open to students from any U.S. college or university.

WHAT MAKES ACM PROGRAMS DISTINCTIVE?

- **Small program sizes.** Limited enrollments ensure close interaction with faculty and make it easy to get to know your fellow students from other liberal arts institutions.

- **Customized academic options.** You can explore individual interests through independent study projects, hands-on research, and internships/practicums, maximizing your study-away experience.

- **Total immersion.** Coursework is thoroughly integrated with the program location, bringing historical sites, cultural activities, and community engagement to the forefront of learning.

For more information about ACM off-campus study programs, including application instructions and deadlines, visit ACM.edu/programs.
